Gaps: All trees, except dead standing and non-coniferous trees, within 50 feet of a tree that has Yellow paint above and below stump height are designated for cutting. Yellow painted trees are to be left standing.	DxD: Outside of Skips, Gaps, and other Specifications, all trees except dead standing and non-coniferous trees are designated for cutting if they are within <b>&lt;see table below&gt;</b> feet of a tree that has a larger stump diameter than it. . Trees within Skips may be used to determine cut trees outside of the Skip.
566	<ul style="list-style-type: none"><li>• Leave all Engelmann spruce.</li><li>• Cut all alpine fir and grand fir not marked in yellow or orange paint less than 25 inches diameter measured outside bark at 4 inches above ground.</li><li>• Cut all conifer trees except dead standing, ponderosa pine, and western larch 50 feet around Aspen Clones.</li></ul>			18

DESCRIPTION PURSUANT TO KT-CT.3.5.7# - INDIVIDUAL TREE DESIGNATION (OPTION 1) (06/2008)

Definitions:

Distances are measured slope distance, outside bark minimum stump height to outside bark minimum stump height.

Minimum stump height is measured **4** inches from the ground on the uphill side of the tree. Trees will be cut at or above minimum stump height, not to exceed maximum stump height in AT.6.

Stump diameter is measured outside bark at minimum stump height in a horizontal plane and is the average of a measurement across the short axis through the true center of the stump and a second measurement at right angles to the short axis.

Trees that fork below minimum stump height will be considered 2 trees. Trees that fork above minimum stump height will be considered 1 tree.

Conifer Clumps are two (2) or more conifer trees that have stumps within one (1) foot at the closest point and are greater than ten (10.0) inch stump diameter measured outside bark at 4 inches above ground. All trees in the clump are considered one (1) tree for clearing and spacing purposes.

Aspen Clones are three (3) or more live aspen trees greater than 6.0 inches diameter measured outside bark at 4 inches above ground (5.0 inches DBH) that are within 20 feet of each other measured stump face to stump face. All trees in the clump are considered one (1) tree for clearing and spacing purposes.

Gaps are individual trees to be left, painted with Yellow paint and clearing around the painted trees to create openings. Gap locations are located by GPS points and located on the Contract Area Map.

Skips are individual trees to be left, painted with Orange paint and leaving all trees around the painted trees to create leave or untreated areas. Skip locations are located by GPS points and located on the Contract Area Map.
